

EPoS FOR SAGE ACCOUNTING

RETAILERS TAKE CONTROL WITH DB COMPUTER SOLUTIONS

Electronic Point of Sale Solutions (EPoS) from DB Computer Solutions drives fully integrated retail control for single or more complex multi-store requirements. By combining proven, robust EPoS software integrated with your Sage accounting solution, and deployed with state-of-the-art point of sale hardware, EPoS from DB Computer Solutions delivers agility, flexibility, and accuracy to help retailers maximise opportunity and profits.

LEADING EPoS SOFTWARE

DB Computer Solutions has partnered with Elite Integrations, a leading specialist of feature-rich cutting-edge EPoS solutions, to deliver flexible integrated control. Out-of-the-box core functionalities provide the instant horsepower most retailers require. But standard configurations can be quickly moulded by DB Computer Solutions engineers to meet unique needs. Rock-solid software reliability supports retailers with best-of-breed performance.

FLEXIBLE CONFIGURATION FOR CENTRALISED CONTROL

Match proven EPoS centralised software with simple-to-use, robust hardware including electronic touchscreen tills, cash drawers, barcode readers, credit card scanners, and more. All hardware is sourced from leading global suppliers including Epson, Dell and IBM.

FULL SAGE ACCOUNTING INTEGRATION

EPoS from DB Computer Solutions easily integrates with Sage 50, Sage 50c, and Sage 200. Automatically migrate retail transaction data to your Sage solution for all accounting requirements, compliance, and deep management insight.

AGILITY TO STAY ONE STEP AHEAD

Quickly add new products, pricing, and promotions to stay ahead of changing market conditions and competitors, while motivating end-customer loyalty.

CENTRALISED STOCK UPDATE

Always know exactly how much stock your business has on hand, across an infinite number of product lines.

FULLY SECURE

Make certain only authorised employees are allowed access to your EPoS system with secure permissions-based control. Add and delete employee permissions instantly.

INTEGRATE ONLINE PAYMENTS

Are you simultaneously running online and bricks and mortar operations? EPoS from DB Computer Solutions centralises retail accounting and management data for comprehensive operating overviews.

SAGEPAY FOR ONLINE TRANSACTIONS

Integrate SagePay to your online operation for simplified credit or debit card authorisation and payments.

EASY TO USE AND DEPLOY

EPoS Systems from DB Computer Solutions are easy to use and quick to deploy. Configuring your business on our EPoS solution takes only hours, not days. And easy-to-learn centralised software enables you to take control of your operations, instantly.

SUPERIOR BENEFITS

EPoS from DB Computer Solutions delivers real benefits to retail operations:

- Centralised retail control for flexibility and agility
- Fully integrates with Sage 50, Sage 50c, and Sage 200
- Maximise point of sale customer service levels
- Speed stock takes for increased productivity and accuracy
- Accelerate promotional offers to capture additional share of wallet
- Maximise management insight and control
- Increase employee efficiency
- Drive additional profitability while minimising costs associated with excess stock and operating inefficiencies

ROADMAPPING FOR SUCCESS

With over 20 years' experience, DB Computer Solutions Consultancy Teams help our customers to roadmap an EPoS solution to meet your exact requirements. We also offer complete deployment, training, and ongoing support to make certain our customers get the most from your EPoS solution.
