

# DBCLOUD

RUN YOUR FAVOURITE APPLICATIONS & DATA OVER THE CLOUD

## THE STATS

- High Availability and Performance - 5 x 9s reliability
- Low Latency - 1 - 2 ms at local level
- Local Data Centre - located in Dublin
- Reliable Data Centre Infrastructure - HP SAN environment, Fortigate Firewalls, Netgear switches
- 24 / 7 Support - data centre is manned 24 / 7 by expert teams of engineers

## PROTECTING APPLICATION AND DATA PERFORMANCE

- Automatic Failover / Managed Failback processes
- Quickly grow storage and compute resources to match business requirements

## DATA SECURITY

- Automatic nightly data backup
- Additional off-site data backup / replication
- Multiple firewalls, real-time data replication, ISO 27001 certified

If your business relies on critical applications and data such as Sage accounting, Sage CRM, payroll, Microsoft Office 365 or more, but you've always wanted the anytime / anywhere flexibility of Cloud Computing, **now you can with DBCloud.**

DBcloud from DB Computer Solutions allows you to transform your business by running your favourite applications within a powerful, robust Private Cloud environment.

- Remote Access - access your applications and data from anywhere in the world over PCs, laptops, or any smart device.
- High Performance - state-of-the-art cloud infrastructure delivers high levels of reliability and performance for single or integrated applications. Your applications and data are available almost instantly via the Internet.
- High levels of Security - data is protected against attack by rigorous data protection processes and defences including firewalls, automatic backup, and replication.

## HOW IT WORKS

Getting up and running with DBcloud is straight-forward. We migrate your applications (including all functionalities) and relevant data to bespoke Virtual Machines located in our data centre (co-location is also an option). Following testing, we show you the ease with which you can access software applications and data within your robust DBcloud.

With DBcloud, you are no longer limited by software deployed only on your office LAN system, or the performance of 3rd Party hybrid cloud environments.

DBcloud gives you the flexibility and high performance your company needs to increase agility, productivity, competitive advantage, and security in a constantly changing business world.

## THE SUBSTANTIAL BENEFITS

- Maximise ROI – by minimising hardware requirements
- Future Proof – increase or decrease cloud resources (storage capacity, compute) almost instantly
- Agility / Minimising Time to Market – deploy new applications quickly
- Productivity and Freedom – access data remotely at anytime from anywhere; full access to backend databases
