>> Outstanding new Efficiency and Value with the 2018 Summer Release of Sage 200cloud <<

## Customer Value Proposition - Summer 2018

### Problem

### Solutions

### Value / Benefit

1

Late Payments

Connect to Sage Business Cloud Payment integrations providers - GoCardless, Stripe and PayPal.

Never worry about late payments again. Sage 200cloud now integrates with top payment providers to enable more ways to pay - via automated direct debit and card payments.

2

Communication channels

Use skype for business to communicate directly from within Sage 200cloud.

Reduce costs and stay connected. Sage 200cloud now integrates with Skype for business - making it easier for users to communicate with customers and suppliers.

3

Sales Order Processing (SOP) Limitations and costs

Sales Order Processing (SOP) entry enhancements reduce the need for third party add-ons.

Perform fundamental SOP operations from within Sage 200cloud, reducing the need for third party add-on integrations and investments.

4

Deployment

A choice of deployment enables customers to choose the method most appropriate for them.

Sage 200cloud offers a choice of deployment to enable business partners to apply the most appropriate option for customers – classic vs. one click.

# The Many New Features

Sage 200cloud Summer 2018 Release is enhanced to deliver additional functionalities to DB Computer Solutions customers for new efficiency, productivity, and profits. Innovative features include

## Feature Value Messaging - Summer 2018 Release

	Value Headline	Value Messaging
<b>Payments Integration</b>	Never worry about late payments again	With integration to Sage Business Cloud Payments solutions including GoCardless, Stripe and PayPal, Sage 200cloud enables customers to manage their money easily, providing a seamless money management solution. Payments integration provides a safe and easy way for customers to get paid - on time, every time.
<b>Office 365 -Skype Integration</b>	Communicate with customers and suppliers directly from Sage 200cloud.	Reduce costs and stay connected. Skype for Business integration means Sage 200cloud users can benefit from messaging, voice calls and video calls – directly from within the software, both in and out of the office.
<b>SOP enhancements</b>	Perform SOP operations from within Sage 200cloud rather than third party add-ons	SOP enhancements provide additional functionality which allow users to manage their entire Sales Order Process directly from Sage 200cloud. Features include enabling users to cross-sell related products, create sales based on a customers preferred/favourite items, create orders from items in history, and create customer-specific memos during order entry.
<b>Choice of deployment</b>	You asked, we delivered! Choose the deployment method most appropriate to you.	With Sage 200cloud, users can now benefit from the introduction of one click deployment. This enables users to work with their business partner to agree which choice of deployment is the most appropriate i.e. classic versus one click
<b>Education</b>	Link scanned documents to a transaction and directly access them from Sage 200cloud Standard, and more.	Streamline incoming document management and boost productivity with the power to capture, securely store, and retrieve any of your documents whenever, wherever. Document capture ensures all your important business information is always to hand.
