

Sage 200 from Computer Solutions

Sage 200: Powerful Business Management for Growing Companies

- **Business management software** combining financials, stock & operations
- **Designed for organisations scaling beyond entry-level** accounting
- **Cloud-connected** with flexible deployment options

What is Sage 200?

Sage 200 is a **flexible business management solution** designed to **manage your finances, supply chain, customers & insight** in one integrated system.

Backed by over 30 years of Sage expertise, it combines:

- Core financial management
- Supply chain & stock control
- Sales & purchase order processing
- Project accounting
- Manufacturing (BOM & MRP)
- Excel-based reporting
- Role-based dashboards & workspaces
- Cloud & on-premise deployment options

We support Irish Businesses with the following processes in relation to Sage 200:

- Implementation & onboarding
- System scoping & configuration
 - Cloud & hosted deployment
- Manufacturing & project module integration
 - Add-on & CRM integration
- Upgrade & migration planning
 - System optimisation
 - Ongoing support & training

Built for the Next Stage of Growth:

Sage 200 is often the natural progression for businesses outgrowing Sage 50. As complexity increases further, particularly across:

- Multi-entity group structures
- Advanced financial consolidation
 - International operations
- Real-time executive reporting

Sage Intacct provides a modern cloud financial framework designed for scaling organisations.

DB Computer Solutions helps you evaluate when - and if - that move makes sense.

Sage 50 → Sage 200 → Sage Intacct

Sage 200: Built for growing Irish businesses.

Supported by **DB Computer Solutions**.
